Larch wood is tough, waterproof, decay-resistant, and durable. It's top quality knot-free timber is greatly in demand for building yachts and other small boats, for exterior cladding of buildings, and interior panelling.

The Larch by MossCreek symbolizes that same durability to outdoor elements with an exterior of stone, timbers, wood, and glass. The interior of the Larch is rich with timbers and vaulted ceilings. An open living plan ensures that everyone is a part of the fun. A grand master suite on the main level, combines with two full bedroom suites on the upper level, to create the perfect home to relax in the rustic regions of the American countryside.
