The Trails End is a clean and elegant plan with an authentic, lake cottage feel that is complemented beautifully by natural surroundings. With 3 large bedrooms, 2.5 baths, an open floor plan designed for family gatherings, and an oversized great room with volume ceilings, the Trails End delivers approximately 2400 square feet of heated living space. Generous outdoor living area including two covered porches, a large deck, outdoor fireplace and optional outdoor kitchen, combined with a dramatic balcony overlooking the great room and gourmet kitchen are just some of the Trails End's many attributes.
